TRUCK LOADING CONVEYOR

FLEXIBLE ROLLER CONVEYORS

POWERED & GRAVITY

Flexible conveyors are designed for versatility and mobility. They are ideal for extending, retracting and navigating around obstacles. Perfect for loading/unloading applications with minimal space requirement.

FEATURES

- Best suitable in truck loading/unloading application
- Requires less storage space when fully retracted
- Available in both mild steel and stainless-steel structure
- Weight carrying capacity up to 95 kg / meter in powered flexible conveyor system which is highest in the industry
- Powered conveyor is suitable for transfer any products at variable speed
- Less maintenance
- Self tracking design
- Mostly Used in all General Applications area
- Heavy duty 5" caster wheel
- Handles at each end of units

OPTIONS

- ✓ Photo sensor for package stop
- ✓ Zero pressure accumulation
- ✓ Master/Slave provision to connect multiple conveyors
- ✓ Side guides

AVAILABLE WIDTH

in two standard width options.

- 600mm
- 800mm

UNLOADING

SPACE SAVING &
SIMPLE TO USE

Truck loading conveyor is designed for fast and efficient loading and unloading of materials from trucks and containers.

FEATURES

- Best suitable for automatic truck loading/unloading application
- Inclined belt conveyor with hydraulic adjustment gives flexibility to load/unload different height vehicles.
- Best Suitable for All vehicle loading/unloading up to 40 feet
- Weight carrying capacity up to 50 kg / meter.

SPECIFICATIONS

- Roller Width: 400, 600, 800, 1000mm
- Length: 4000mm and up
- Light Load version: Up to 50 Kg/m
- Heavy Load version: Up to 100 Kg/m
- Speed: Up to 40 mpm
- Height adjustment 800-1000mm

**FAST & EFFICIENT
LOADING/UNLOADING**

**STRONG & DURABLE
CONSTRUCTION**

**HEIGHT ADJUSTABLE
& EASY TO OPERATE**
